

METALLIC

WHAT IS **METALLIC SPECIAL EFFECTS?**

At Colour Coats, we aim to help you explore a wide range of colours, textures, and effects to elevate your space's beauty. Introducing, the ICA and Elekta metallics range, for a velvety stain look with a smooth finish.

Why choose our **METALLICS?**

ICA METALLICS

The satin finish metals of the urban matter range are characterized by their high opacity and are offered in 5 different finishes: “lead”, “gold”, “steel”, “bronze” and “copper”.

The ICA metallics range combines a gloss base with a water base coating to achieve a highly lustrous finish that rivals all other classic finishes.

ELEKTA METALLICS

The Elekta metallics range combines pure micronized metals with resin to provide the tactile effect of real metal with a lustrous effect. The final treatment is supplied with abrasive paper to obtain opaque or polished surfaces with a beautiful mirrored finish.
